

RNJ

Rack and panel cylindrical connectors

MAIN CHARACTERISTICS

- EMI shielding
- Shells are grounding before contact mating
- Lightweight space saving design
- Durability:
500 cycles
- Moisture resistance:
in addition interfacial seal, main joint souffler and rear gasket on the plug are set up for moisture sealing between connectors halves
- Corrosion resistance:
 - Olive drab cadmium over nickel plating on aluminium shell (withstands 500 hours salt spray exposure) or electroless nickel
 - Free cadmium version also available.
- 8 shell sizes from 11 to 25
- Contact protection:
 - 100% scoop-proof. The design prevents bent pins and short circuit during mating.
 - From 1 to 128 contacts in accordance with Mil-C-39029 standard
 - Crimp contacts size 22D, 20, 16, 12, 8, 4, 00.
 - PCB contacts size 22D & 20 (size 16, 12, 8, please consult Amphenol)
 - Wire-wrap contacts size 22D & 20
 - Optical termini (POM series) in accordance with Mil-T-29504 standard
- For environmental applications:
supplied without rear accessories. Design provides serrations on rear threads of shells. Compatible with some M 85049 rear accessories for MIL-C-38999 I connectors. Please consult us.
- Temperature range:
-65°C +175°C
- Insulation resistance > 5000 Mohms at ambient under 500 Vcc

Figure 1 - FEATURES

DESCRIPTION

The RNJ series rack and panel connectors are qualified for the requirements of the standard DAT C 5935 x 0005 HE308 21, 25, 26 & 27T models.

They are used to connect electrical and optical devices between a moving unit (rack) and a fixed unit (panel) without any coupling / uncoupling device. This function is ensured by the moving and the fixed unit system.

They allow to integrate the design tolerances between the moving and fixed unit, up to limits indicated figure 1 during the mating of the connectors and up to the rack bottoms the fixed chassis.

These connectors are derived from the LJT series and meet or exceed the MIL-C-38999 Series I requirements.

RNJ: the environmental rack connection

APPLICATIONS

- Military applications & Aeronautic
- Advanced industrial applications

RNJ

Presentation

- 1 - Receptacle shell
- 2 - O ring
- 3 - Hexagonal nut
- 4 - Rivet
- 5 - Sealed membrane
- 6 - Free plug shell
- 7 - Fixed plug shell
- 8 - Panel nut (plug)
- 9 - O ring
- 10 - Sealed membrane
- 11 - Grommet
- 12 - Dielectric retention disc
- 13 - Pin contact
- 14 - Male insert
- 15 - Interfacial seal
- 16 - Female insert
- 17 - Grounding fingers
- 18 - Socket contact
- 19 - Spring washers

Environmental characteristics

- Temperature range: -65°C to +175°C
- High temperature endurance 1000 hours
- Humidity 100% R.H.
- Air leakage: 16 cm³/h max under 2 bars differential pressure
- Salt spray:
 - olive drab cadmium 500 h
 - electroless nickel 48 h
- Fluid resistance:
 - MIL - L - 7808
 - MIL - L - 23699
 - MIL - H - 5606
 - Hydraulic fluid (Chevron M2V)
 - MIL - A - 8243
 - MIL - C - 25769 (alkaline solution)
 - MIL - T - 5624 (JP5)
 - Coolanol 25 or equivalent
 - MIL - G - 3056 (Type 1) or equivalent
 - Solvents (a), (b) and (c) MIL - STD 202, method 215
 - Oil OMD 69/110 - 20 W/40 - 0/180
 - Mineral hydraulic fluid H 515 x XH 45
 - Synthetic hydraulic fluid H 542
 - Military fuel, gas-oil F46 and F54

Mechanical characteristics

- Insert retention in the shell: 7 bars
- Contact retention in the insert:

Contact size	22D	20	16	12	8	4	00
Maximum load (N)	45	67	110	110	150	150	150

- Mated and unmated forces

Shell size	Maximum mated force (daN)	Maximum unmated force (daN)
11	20	12
13	30	13
15	35	15
17	50	16
19	55	18
21	65	22
23	80	27
25	102	34

- Durability: 500 cycles
- Sine vibrations 10 . 2000 Hz 30g
- Random vibrations 10 . 2000 Hz 28g
- Shocks: 150g 3 ms 1/3 sinus

Electrical characteristics

- Contact rating: nominal current per contact:

Contact size	22D	20	16	12	8	4	00
Current (A)	5	7.5	13	23	60	100	230

- Contact resistance:

Contact size	22D	20	16	12	8	4	00
Contact resistance (mohms)	8	4.7	2	1.1	0.6	0.26	-

- Insulation resistance: - at ambient > 10⁵ Mohms
- at maximum temperature > 10³ Mohms

- Service rating:

Service (p. 4/5)	Dielectric withstanding voltage (Vrms)								Working voltage	
	At sea level		15000 meters		21000 meters		34000 meters		Vrms	Vdc

All dimensions which are not mentioned meet the Mil-C-38999 Series I Standard.

Connector mounting

Generalities

- The dimension of $36^{+0}_{-0.5}$ between flange is imperative to secure the technical performances at the mating position.
- A guiding system has to make the right position of the rack independently of the connectors.
- No mechanical stress must be applied to the rear of the plug by the wires.
- To mount an accessory on the plug, it is necessary to use a holding support to stop the internal set of the plug.

Mated connectors

Panel drilling and recommended hexagonal nut coupling torque

Plug	Shell size		K (min)	W (mm)	Diam. X (mm) +0.1/-0	Nut coupling torque (min)
	Plug	Receptacle
