High Power Connector Series

RHINO 6668C

High Power Connector Series

Amphenol Ltd combines the benefits of field proven Mil-DTL-38999 Series III circular connectors with hyperbolic contacts that extend the boundaries of high power connector technology. Designed to meet the latest military and industrial specifications and stringent safety requirements, Rhino 38999 connectors are being utilised across a wide range of critical power applications.

Amphenol is the foremost manufacturer of both connectors and interconnect systems specifically for applications within military, aerospace and industrial markets.

As such, Amphenol has recognised a distinct trend towards increasing power and voltage requirements within a range of applications including military and electric drive vehicles, aircraft handling and military base station installations.

High reliability applications including vehicular, aerospace, industrial, automation, mining, offshore and other harsh environments can all be addressed using the Rhino 38999 which is derived from the standard MIL-DTL-38999 series originally designed by Amphenol. Critical features of this series including six unique keyways, an anti-decoupling mechanism, superior EMI performance, Tri-Start thread, 500 hrs Salt Spray endurance, GVA Compliance and high vibration tolerance.

The modular, easy to install Rhino 38999 Series of connectors provide IP2X finger protection on both plugs and receptacles in addition to being fully IP69K sealed against ingress of dust and moisture. Flange Mount, Jam Nut or Inline standard connections with either straight or right angled EMC backshells are offered with single pole,

high reliability, low contact resistance RADSOK® contacts giving durability beyond 500 mating cycles.

The use of RADSOK® contacts creates an electrical interface that exceeds typical interconnect requirements via a hyperbolic socket contact construction. RADSOK® distributes normal forces over a high percentage of the mating surface to ensure a smooth and even engagement force with exceptionally high performance under vibration.

Rhino 38999 connectors are available in a variety of shell materials including Aluminium Alloy, Titanium, Stainless Steel and Aluminium Bronze; in a variety of plating finishes including Amphenol's environmental award winning RoHS compliant Black Zinc Nickel, Electroless Nickel and Olive Drab Cadmium; and equipped with a variety of contact termination styles including crimp, busbar and lug termination. In addition, Amphenol is able to offer a full range of custom configurations to allow breakaway, through-bulkhead or push-pull functionality.

Amphenol also offers a full design and manufacturing service utilising standard Rhino 38999 connectors in traditionally built cable harnesses or low-profile overmoulded configurations up to 1000A capacity.

Part number example

Rhino 38999 performance information

Test Parameter	Description
Electrical	
Current Rating	Up to 1000A, see page 9 for de-rating information
Shell to Shell Continuity	Less than 2.50mΩ initially, in accordance with EIA-364-83
Shell to Backshell Continuity	Less than 5.00mΩ initially, in accordance with EIA-364-83
Contact Resistance	See page 9
Insulation Resistance	5000MΩ
Working Voltage	Size 13 to 15: 500Vac RMS at sea level, 600Vdc at sea level Size 17 to 25: 875Vac RMS at sea level, 1238Vdc at sea level
Dielectric Withstand Voltage	Size 13 to 15: At 1500Vac RMS, 2mA max leakage current in accordance with EIA-364-2
	Size 17 to 25: At 2625Vac RMS, 2mA max leakage current in accordance with EIA-364-2
EMI	360° screening facilitated with straight or 90° EMC backshell
Technical	
Mating Durability	500 cycles minimum, contacts rated to 20,000 cycles
Non-Magnetic	Yes
Termination Style	Crimp, Lug, Bus-bar
Coupling Method	Anti-vibration Tri-start thread
Mating Force	As Per MIL-DTL-38999L Table IV
Backshell Options	Straight, Right Angle or Locking Ring only
Panel Cutouts	As per MIL-DTL-38999L for rear mounting receptacles only

Environmental	
Operating Temperature	-55°C to +150°C*
Sealing (Mated and Unmated)	IP69K, 1hr at 2 metres immersion and proof against high pressure steam jet cleaning
Salt Spray	Plating dependant, eg 500hrs for Black Zinc Nickel
Shock and Vibration	In accordance with DEF-STAN 00-35 Iss 4 Ch2 01 test M1 Appendix A Figs A22 – High Level and A23 Low Level**
Impact	In accordance with EIA-364-42 Light Service Class
Fluid Resistance	As per Mil-DTL-38999L
Safety	IP2X Finger Protection in accordance with BS EN 60529 mechanical finger
RoHS Compliant	Yes, unless Olive Drab Cadmium plate is specified

* Including environmental and contact self-heating, see de-rating curve.

** Cables should be supported to provide strain relief as close to the rear of the connector as practical. Bus bars should be kept to a minimum length practical, suitable CSA and appropriately supported for best performance.

Rhino 38999 keyway orientations

A plug with a given orientation letter will mate with a receptacle with the same orientation letter. The angles for a given connector are the same whether it contains a pin or socket contact. Views shown are from front face of the connector.

Shell size	Keyway letter	AR/AP	BR/BP	CR/CP	DR/DP
13 to 15	N	95	141	208	236
	A	113	156	182	292
	B	90	145	195	252
	C	53	156	220	255
	D	119	146	176	298
17 to 25	E	51	141	184	242
	N	80	142	196	293
	A	135	170	200	310
	B	49	169	200	244
	C	66	140	200	257
17 to 25	D	62	145	180	280
	E	79	153	197	272

Rhino 38999 backshell exit-angle

A key feature of the Rhino 38999 connectors is the flexibility to select the exit angle of the 90° backshell at the time of installation. The angle of exit relative to the main keyway can be set in 45 degree increments and is fixed at the time of terminating the connector. This enables adjustments to be made and optimisation of the mounting and cable runs right up until the point of installation.

Castellated teeth on the back end of the connector shell mesh to those of the right-angle backshell and are secured as the contact is fixed in place using the 90° contact assembly tooling described on page 47.

Rhino 38999 contact information chart

The below table provides supplementary data on electrical properties of the high performance Radsok contacts used in Rhino 38999 connectors.

Shell size	Pin contact size (mm)	Contact resistance (mΩ)	Max current rating* (A) ambient	Contact mating force (N)
13	3.6 mm	0.15	85A	10
15	6.0 mm	0.11	120A	20
17	8.0 mm	0.08	185A	50
21	10.0 mm	0.06	340A	70
23	14.0 mm	0.05	500A	90
25	18.0 mm	0.02	1000A	130

*See chart below for more information

Rhino 38999 de-rating chart

The chart below is intended as a guide only, when used with the stated cable sizes on the plug and receptacle. It is the designer's responsibility to consider all physical and environmental factors which may affect de-rating and specify with some margin within these guideline limits. However Amphenol Ltd welcomes the opportunity to work alongside the designer in selecting appropriate connector solutions.

Rhino 38999 crimp contact chart

Rhino 38999 connectors may be terminated to many cable brands including Axon, Habia, Huber+Suhner, Prysmian and TE. Different methods of cable construction can lead to variations in stranding, compactness, tolerances and dimensions beyond our control. Therefore, whilst Amphenol cannot recommend the use of any particular cable type or brand, our Application Engineers are available to offer advice on crimp termination methods depending upon what tooling the Designer has available. The table below is intended as a guide only and it is recommended that crimp and pull-off tests be conducted to verify the contact termination method and tooling ultimately selected by the Designer.

For details of proven crimp tooling and die sets please refer to document 123GB-0846 available on the Amphenol Rhino 38999 website.

Shell size & current rating	Contact termination	Crimp barrel bore ID	Min acceptable cable core OD	Approx cable current rating @ 40°C

*consult factory for availability

Part number example

The dust cap for the Rhino 38999 series is available in two styles: metal or polymer.

Rhino 38999 caps are all supplied with a 450mm +/- 6mm black Terylene cord lanyard, basic crimp ferrule and crimp eyelet for the user to terminate to their own specification.

Accessories

WPTV-PC-XX-XX

Notes:

Rhino 38999 is designed to fit within existing MIL-DTL-38999L panel cutouts when fitting from the rear of the panel in all cases. When installing wall mount receptacles choose dimensions from either the C Imperial or C Metric columns dependant on the fixings selected. Jam nut mounting receptacles, Wall mount straight backshell 'B' style and all 90° backshell 'C' style connectors are designed for rear mounting applications only. Jam nut max panel thickness is 0.125 (03.18), minimum 0.062 (01.57). Use (W638) deviation code to specify panel sealing gasket to be supplied with Wall mount connector. Please note spacing of connectors and cable may affect heat generation and/or cross-talk, and thus should be taken into account when calculating de-rating.

Installation

Backshell dimensions

The dimensions given below are intended to aid with the selection of heatshrink tubes, adaptors and termination accessories. Rhino 38999 connectors are already supplied complete with backshell components thus eliminating the need to separately procure a suitable strain relief clamp or adaptor.

Rhino 38999 backshells are designed to suit termination by either traditional heatshrink or overmoulding and feature a knurled area for braid retention providing both strain relief and 360 degree screening for when shielded cable is selected.

Shell size	ØA	ØB	ØC	ØD	ØE
Size 13	0.804 (20.42)	0.782 (19.86)	0.689 (17.50)	0.592 (15.04)	0.708 (17.98)
Size 15	0.992 (25.20)	0.940 (23.88)	0.848 (21.54)	0.751 (19.08)	0.867 (22.02)
Size 17	1.117 (28.37)	1.033 (26.24)	0.941 (23.90)	0.841 (21.36)	0.957 (24.31)
Size 21	1.429 (36.30)	1.263 (32.08)	1.121 (28.47)	1.073 (27.25)	1.189 (30.20)
Size 23	1.554 (39.47)	1.387 (35.23)	1.245 (31.62)	1.198 (30.43)	1.314 (33.38)
Size 25	1.554 (39.47)	1.726 (43.84)	1.584 (40.23)	1.537 (39.04)	1.653 (41.99)

For 90° EMC backshell there is no variation between ØA and ØB; ØB value applies to both diameters. All dimensions are in inches (mm shown in brackets) and are for reference only. Figure not to scale.

Installation

Tooling

90° contact assembly tooling

The contact assembly tooling below is required to terminate connectors with part numbers ending 'C' which denotes a right angle backshell. The tools are required to secure the contact into the backshell assembly. Tooling is gender specific to pin or socket contacts but generic across connector styles – e.g. Plug and Receptacle. For instructions and recommended torque values view the latest issue of document reference 123gb-0845 on our website.

Pin contact assembly tooling

		25	

Castellated Jam nut (W587) assembly tooling

A castellated panel nut is provided in place of a standard nut when deviation W587 is applied to the connector part number. This castellated nut is tightened with the below tooling and used in instances where there are space constraints which prohibit the use of a spanner, or where an extra element of tamper proofing is desired.

Installation

Torque fixtures

The below torque fixtures are available to order as an assembly aid for the termination of backshells and locking rings to the correct torque values. Whilst by no means essential, they are a useful aid in reducing termination and assembly time. For instructions and recommended torque values view the latest issue of document reference 123GB-0845 on our website.

Range extensions

Amphenol Ltd has developed a number of complementary products to the Rhino 38999 range extending its applicability beyond the traditional interconnect styles and methods. The following information is provided as an indicator of available Rhino 38999 range extensions but it is by no means exhaustive. Please consult with the Amphenol Application Engineering team to specify the most appropriate solution for each scenario and should more information be required, then please request a more detailed data sheet or drawing.

Through Bulkhead Rhino 38999

Intermateable with standard Rhino 38999s in a compact bulkhead penetrating format. Supplied as square flange mounting or jam nut mounting. Also available in extended reach penetration shells.

WPTV – B J ZN – 23 – 500 – P S N

- WPTV – Rhino 38999 Series
- B – Thru-bulkhead style
- J – Jam nut style (omit for wall mount)
- ZN – Material/finish (options W, K, S, B)
- 23 – Shell size (options 13, 15, 17, 21, 23, 25)
- 500 – Current rating (options 85, 120, 185, 340, 500, 1000)
- P – Contact gender short side (options P, S)
- S – Contact gender long side (options P, S)
- N – Keyway (options N, A, B, C, D, E)

Reverse Bayonet Rhino 5015

Standard Rhino single-pole power contacts and insulators housed within MIL-C-5015 reverse bayonet style shells for use on vehicle applications in particular.

WP97 – 06 ZN 23 – 500 – 1 P N A

- WP97 – Rhino 97 Series
- 06 – Shell style (options 00, 01, 06, 07)
- ZN – Material/finish (options RW, RF, SS, RB)
- 23 – Shell size (options 13, 15, 17, 21, 23, 25)
- 500 – Current rating (options 85, 120, 185, 340, 500, 1000)
- 1 – Contact termination (1, 2, 3, 5, 6, 7, 8)
- P – Pin contact gender (options P, S)
- N – Keyway (options N)
- A – Backshell (options A, B, C)

Range extensions

Push-Pull Rhino

Standard Rhino single-pole power contacts and insulators housed within a breakaway style shell for rack and panel or push-pull applications.

WPPP - 06 ZN 23 - 500 - 1 P N A

WPPP - Rhino Push-Pull Series

- 06 - Shell style (options 00, 01, 06, 07)
- ZN - Material/finish (options RW, RF)
- 23 - Shell size (options 13, 15, 17, 21, 23, 25)
- 500 - Current rating (options 85, 120, 185, 340, 500, 1000)
- 1 - Contact termination (1, 2, 3, 5, 6, 7, 8)
- P - Pin contact gender (options P, S)
- N - Keyway (options N, A, B, C, D, E)
- A - Backshell (options A, B, C)

Rhino LITE

Rhino LITE is adapted for use with aluminium power cable or busbars and is almost 40% lighter than Rhino 38999. On applications where weight is at a premium, Rhino LITE, when used with compatible aluminium conductors, results in overall power system weight savings of over 30% on average.

WPTV - 06 ZN 23 - 500 - 1 M N A

WPTV - Rhino 38999 Series

- 06 - Shell style (options 00, 01, 06, 07)
- ZN - Material/finish (options RW, RF, SS, RB, RT)
- 23 - Shell size (options 17, 21, 23, 25)
- 500 - Current rating (options 185, 340, 500, 1000)
- 1 - Contact termination (1, 2, 3, 5, 6, 7, 8)
- M - Aluminium contact gender (options M, F)
- N - Keyway (options N, A, B, C, D, E)
- A - Backshell (options A, B, C)

Range extensions

Rectangular Multi-Pole Rhino

For use where multiple poles are required. Suitable for use on batteries. Contact genders are interchangeable and may also be mixed pin-socket combinations – consult factory for availability. Supplied with crimp or busbar style contacts. Contains safety interlock contacts as standard.

WPRR - 06 ZN 3x1 - 185 - 1 P N A

WPRR - Rectangular Multi-Pole Rhino Series

- 06 - Shell style (options 00, 06)
- ZN - Material/finish (options RW, RF)
- 3x1 - Contact array (X contacts by Y contacts)
- 185 - Current rating (options 85, 120, 185, 340, 500, 1000)
- 1 - Contact termination (1, 2, 3, 5, 6, 7, 8)
- P - Contact gender (options P, S)
- N - Keyway (options N, A, B, C)
- A - Backshell (options A, B, C)

Circular Multi-Pole Rhino 38999

For use where multiple poles are required in a circular format. Supplied with crimp or busbar style contacts. Contains safety interlock contacts as standard.

WPTV - 06 ZN 33 - 3 - 185 - 1 P N A

WPTV - Rhino 38999 Series

- 06 - Shell style (options 00, 01, 06, 07)
- ZN - Material/finish (options RW, RF, SS, RB, RT)
- 33 - Shell size (options 29, 33, 37, 41)
- 3 - Number of contacts
- 185 - Current rating (options 85, 120, 185, 340, 500, 1000)
- 1 - Contact termination (1, 2, 3, 5, 6, 7, 8)
- P - Contact gender (options P, S)
- N - Keyway (options N, A, B, C, D, E)
- A - Backshell (options A, B, C)

Products are sold subject to Amphenol's conditions of sale ("the standard conditions"). All specifications and statements contained herein are believed to be correct at the time of printing, but no representation or warranty, express or implied, is given as to any specification or statement contained herein. Product specifications including performance characteristics are typical only and subject to deviation. Specifications are also subject to change without notice. Users should not assume that all safety measures are indicated or that other measures may not be required. No representation or warranty, express or implied, is given that any use of products (including any stated or suggested use) does not infringe any patent, registered design or other third party rights and no stated or suggested use of products can be taken to recommend any such infringement.

Design checklist

Operating environment

Min/max/ambient/working temperatures?
Space envelope inc. moving obstructions?
Weight restrictions?
Mechanical fixing/supports?
Shock and vibration levels?
Sealing requirements mated/unmated?

Electrical performance and load

Peak voltage and current?
Steady state voltage and current?
Duration of electrical load?
De-rating requirements at ambient temperature?
Screened or unscreened termination?

General

Specification requirements e.g. Mil spec, RoHS, GVA, etc?
Mounting preference – sq. flange, jam nut or in-line?
Panel thickness?
Straight or right angle backshell?
Cable source, size and type?
Contact gender and style?
Material and plating preference?
Keyway orientations?
Cable exit angle?
Accessories e.g. sealing gasket, castellated nut, caps?

Tooling

Crimp tooling and die set needs?
Assembly tooling and torque fixture needs?
Assembly instructions to be provided?

Added value solutions

Termination or kitting?
Cable assembly inc. overmoulding?
Bus-bar or box/panel build?
EMI filtering?

Commercial

Export licence requirements e.g. ITAR, end user statement?
Cost budget?
Alternative solution?
